

Pamela Rock Bio

I would like to be considered for the open board director position. My career, as an office manager in a physician's practice for over 20+ years, has utilized my education and prepared me to manage, plan, deliver, and follow-up with people and projects. I am proficient in technology, such as Microsoft Office and computers, and communicating with people to help solve their problems. I would bring these skills to the board of MPOA. I am interested in becoming a member and assist where I can.

My husband, Brian, and I have three adult children, one grandchild, and one on the way. We have lived in Merrymount since 2016 and have found it to be a very socially oriented neighborhood and are blessed in finding such wonderful neighbors. We look forward to many years here.
